Ludo Star 2 is a new ludo game that is free to play and can be played between friends and family. It is the best game to share the great interests and memories of childhood with your friends. Show us if you can master this game. A perfect Ludo board game. 2.0 Master features of Ludo Star 2.- Online/Private Multiplayer Model Ludo Star 2 is a dice board game played between 2 and 4 players. You can play the game with your friends, family or against the computer.

- Do you play the new ArrowsAmor mode by playing the original Ludo with Arrow on the board? We've introduced a new mode called Arrow Mode. - Challenging and excitingThe game is simple at first and as you level up, it will become difficult. The rules are easy; each player receives 4 tiles, which are required to make a full turn of the board and reach the finish line. And whoever first receives all 4 chips will be considered as the winner. We are challenging the kings of Ludo for this amazing game! Other important features of the master:- Play with friends without any bet- Real chat with friendsLudo STAR 2 is an interesting game in which you can play with your friends. The game includes four players red, blue, green, yellow. Is the king of Ludo your friend? Bing all of them! Indian emperors used to play this game once! Ludo is loved by people of all ages. Ready to roll the dice! Make your moves and become a Star with this new version (2.0). Christmas and New Year Package of December 23, 2020 1.24.170.4 - Exciting deals for users specifically for this Christmas and New Year's season has been added improved screen ads Bug fixes The game is fun. I think the doubles game gets confusing and when the game switches to automatic play, it seems out of control. The chat function might have spell checking or some fast type urdu slang as typing with the game running and a timer gets distracted. But otherwise it is very fun to invite friends and play this game! I've played this board game since my childhood and I found this app I was so happy. Not disappointed at all by this app. Very good, almost as good as the real board game. However I realized once I bought the booster and after it has finished its game go through the drain. No matter how hard you try to touch the numbers, it's just never good and your piece always dies. It's like I want me to buy reinforcement or I'll keep losing. It may just be me, but that's the difference I noticed playing ludo before buying the booster and after buying it and I played it. The few things this app can do even better once updated. Add audio option please. My cousins and I take it all the time and it's a shame that we have to do a conference call on WhatsApp or we can't express our feelings 😊 and we all know how it can add to the excitement. Also the option in the quick game is to kill first in order to unlock the house, this should be an option on all levels. I like and appreciate that he added the option to play with 0 coins. Please add the option to collect coins and gems, especially kill in private games as well. Or let us choose partners in 4-player games so we can collect the kills as well. Overall great app and thank you for creating it. I know there is a rule that in 'fast' mode 'a player can enter the goal only after killing 1 opponent's chip' and I support this rule. But my view is that this rule should be changed. Consider a situation. Leaving in quick mode is playing a match between player 'A' and player 'B'. 'A' has killed one or more 'B' tokens and broken the goal path lock. So if at one point you see 4 tokens of 'A' are in the way of goal and none is a goal (which there is still no result of the game) but in the average time 'B' could not kill any token 'A', in this case 'B' will never be able to return to the game because there is no chance of killing any 'A' token and breaking the route lock. So I would finally like to say please make a rule that. If in fast mode if for 'A' player 4 chip are on target this automatically for 'B' the player's goal path will break. In this case 'B' it will not be necessary to kill any token of 'A' to break the blocking of the goal path. In the end, I must say please take my opinion into consideration. Thank you.
