Calligraphy practice sheets are all the rage these days, and FREE makes everything even better. The reason for this popularity is that there is no better way to give yourself structured practice when you are first starting out. Once you get a handle on your first script, you will understand the best way you learn personally. But until then, these will allow you to get a jump start on learning a lifelong skill. So if you are a beginner, the question is what calligraphy script are you interested in learning? What alphabets do you want to master? If you are unsure at this point but you want to get a little taste of what kind of calligraphic scripts (or incorrectly called "fonts") you can quickly check out my post on the Complete Beginners Guide. Modern Brush Calligraphy First off, the most popular of the free calligraphy practice sheets. These modern calligraphy practice sheets are designed to be completed with any brush pen or even Crayola Markers. Above is an example of the first page of what the calligraphy practice sheet looks like. The letters are separated into each singular brush stroke and every change in direction is numbered and indicated by an arrow. There is then space to the right of the example letter for you to practice the letter as many times as you can. If you are just starting to learn how to use a broad edge pen to write blackletter scripts, this is the perfect script to begin with. This sheet is designed for the 6mm Pilot Parallel Pen and is 4 nib widths high. This set of sheets are not in alphabetical order but instead are in order of difficulty. Starting with "I" the letters get more complicated and move into the ascenders and descenders (uppercase and lowercase letters). There are no arrows on this set of practice sheets to indicate direction, but I made a detailed video demonstrating how to properly utilize broad edge pens for blackletter calligraphy. Follow along with my video here: Learning Simple Gothic Just so you are aware...
